

**"EAST MEETS WEST" EXPERIMENTAL PHENOMENON  
SIENNÁ RELEASES NEW CHILL-OUT**

Sienná announces the 8th original release, Moon Rituals 月儀式, on the day of Snow Moon Sunday, 9th february 2020 online worldwide. Unlike her former studio albums, this new release essentially consists throughout of chill-out songs – and all about the different phases of the moon in the Japanese cultural context.

Sienná goes back to her roots and have imaginative play with a collection of music she grew up with on this album. She finds that her hometown Kyoto, Japan and its local culture plays a big role in her music, from composition to delivery. In combination with her memories, fascinations and views as a person who now resides in Norway – where she works as an on-the-rise songwriter and producer – here 's the result that contains freshly squeezed 9 mood boosters.

Sienná knows how to lead you down the most wildly unexplored terrain of sonic-landscapes, and hopes the new album, Moon Rituals 月儀式, will provide you a refreshing twist in your personal playlist.

ABOUT SIENNÁ

As a Japanese expatriate in Norway and live-electronic artist who has performed across Europe over 10 years, Sienná not only acts as an unique innovator; but also fearlessly brings 'no rules' approach to creating dreamy compositions through a command of the avant-garde genre consisting of electronica, EDM, jazz, classical and traditional-contemporary Japanese. This uniquely ambitious artist is rebelling against the copycat music trend and quickly emerging as an artistic medium, who can transcend the label of "commodity" and become something much more sophisticated and immersive.

Sienná is also known for collaborations with renowned artists including Nils Petter Molvaer, a psychedelic jazz trumpeter from Norway, Mick Karn, a deceased English bassist for the new wave band "Japan", and The Crazy World of Arthur Brown, where she performed as an opening act to the band in the UK on several occasions.
